## Improving your AutoCAD Experience Aquarium, downtown lunch & learn September 23, 2009

Please join Hewlett-Packard (HP), Technical & Scientific Application, Inc. (TSA), and Total CAD Systems Inc., for a free lunch & learn at the Aquarium downtown --- on the third floor, Nautilus Ballroom. Discover what it is like to run AutoCAD on a new, powerful HP Z800 workstation and you'll be amazed by the output on HP large format printers.

Total CAD Systems will be showing off the latest AutoCAD features and functionality in a live demo, while HP, TSA and others will deliver short presentations on the hardware and printing supplies that supported the demo.

The lunch will start at 12pm and end at 2pm. It could be the best 2 hours you will spend that day.

From the balcony, you can take in views of the downtown skyline. And inside the aquarium you can enjoy the "underwater adventure" and more...
